

### **AMENDMENTS TO THE CLAIMS**

Please amend the claims as follows:

Claims 1-32. (Canceled)

33. (New) A method for automating the revision and integration of information into an electronic database, comprising:

(a) creating one or more textual templates representing predetermined digital information contained in said electronic database;

(b) configuring said textual templates, and

(c) sending said textual templates via electronic mail to at least one recipient, and

(d) editing of said textual templates by said recipient, and

(e) sending the edited textual templates back to said electronic database, and

(f) updating said electronic database with said said edited textual templates,

whereby providing a means to verify the accuracy of the digital information contained in electronic databases.

34. (New) A method for automating the revision and integration of information into an electronic address book, comprising:

(a) creating one or more textual templates representing predetermined digital information contained in said electronic address book,

(b) configuring said textual templates, and

(c) sending said textual templates via electronic mail to at least one recipient, and

(d) editing of said textual templates by said recipient, and

(e) sending the edited textual templates back to said electronic address book,  
and

(f) updating said electronic address book with said edited textual templates,  
whereby providing a means to verify the accuracy of the digital information  
contained in electronic address books.

35. (New) A method for automatically updating a secondary electronic mail  
system with the information contained in a primary electronic mail system comprising

(a) creating one or more textual templates representing predetermined digital  
information contained in said primary electronic mail system, and

(b) configuring said textual templates, and

(c) sending said textual templates via electronic mail to at least one recipient, and

(d) editing of said textual templates by said recipient, and

(e) sending the edited textual templates back to said secondary electronic mail  
system, and

(f) updating said secondary electronic mail system with said edited textual  
templates,

whereby providing a means to verify the accuracy of information copied from one  
electronic mail system to another electronic mail system.
